I.	Summary	2
II.	Background and Respondent Profile	6
III.	Drone Technology	10
IV.	E-Scooters	23
V.	5G Networks	30
VI.	Autonomous Vehicles	36
VII.	Concerns and Hopes for Technology	38

Drone Technology – Awareness, Sentiment, Use

- **50%** of respondents were **aware of drone technology and all of its applications**. A further 46% were aware but not fully familiar with all applications.
- **84% felt positive** about drone technology overall.
- **16%** indicated that they had used a drone as a **hobby**.

Drone Technology – Likely to be Part of your Life by 2025

- **68%** of respondents felt it likely that drones will be part of their life by 2025 **“For mail”**. This was followed by **“To get takeaway delivered” (64%)**, **“Online shopping delivery (61%)**, **“To get groceries” (55%)** and **“To use as an air taxi” (18%)**.

Drone Technology – Sentiment Towards Use to Deliver Public Services

- **97%** of respondents felt positive about the use of drone technology for **Emergency Services**. This was followed by **Planning (96%)**, **Environmental Monitoring (95%)**, **Waste Management (94%)**, **Traffic Management (92%)** and **Policing (81%)**.

Concerns About the Use of Drones

- **Privacy Concerns** were a top concern for **75%** of respondents, followed by **Security Threats (54%)** and **Safety Concerns (50%)**.
- **18%** of respondents reported having personally **experienced a concern** when seeing a drone in their local area.
- **61%** of these related to concerns around **privacy**.

Access to Information about Drones

- **11%** of respondents felt it would be **easy to find out about the purpose / ownership of a drone** if they saw one flying in their local area.
- **60%** felt that it would be **essential** that members of the public should be able to get information about drone flights openly.

Awareness of Drones Regulator

- **19%** of respondents indicated that they know who is responsible for regulating drone use in Ireland. When prompted, **78%** of these correctly identified the Irish Aviation Authority as the regulator.

E-Scooters – Awareness and Sentiment

- **83%** of respondents were **aware of e-scooters and knew what they were**.
- **72%** felt that e-scooters will have a **positive** impact.

Positive Aspects of e-Scooters

- **64%** of respondents selected **“Easier to get around towns and cities”** as a positive aspect of e-Scooters, followed by **“Less car traffic on the roads” (55%)** and **“More affordable than car transport” (52%)**.

Concerns about e-Scooters

- **73%** of respondents selected **“Danger to pedestrians / wheelchair users”** as a concern about e-Scooters, followed by **“Children using e-Scooters” (51%)** and **“No test / training for using e-Scooters” (50%)**.

5G – Awareness and Sentiment

- **71%** of respondents were aware of 5G and knew what this meant.
- 90% felt that 5G will have a positive impact.

Positive Aspects of 5G Networks

- **83%** of respondents selected “**Enabling faster data connections on mobile devices**” as a positive aspect of 5G networks, followed by “**Enabling telemedicine**” (47%) and “**Enabling more applications of drone technology**” (36%).

Concerns about of 5G Networks

- 290 respondents cited any concern about 5G. 32% of these related to **concerns about safety / health** (e.g. cancer, radiation).

Autonomous Vehicles - Timeframes

- Respondents predicted that drone delivery will become a reality for members of the public in Ireland by 2027. This was followed by Self-driving Cars (2030), Shared robo-taxis (2031) and Self-driving trucks in convoy (2031)

Concerns and Hopes for how Technology is Evolving

- The most common concern among respondents about how technology is evolving was that it was **evolving too quickly / that it was too hard to understand**.
- The most common hope for how technology will evolve was that it would improve the **quality of life** for all.

I.	Summary	2
II.	Background and Respondent Profile	6
III.	Drone Technology	10
IV.	E-Scooters	23
V.	5G Networks	30
VI.	Autonomous Vehicles	36
VII.	Concerns and Hopes for Technology	38

Background

- Online survey, 7th September – 19th October 2021
- 902 respondents from various sources
- Global margin of error +/- 3.3%

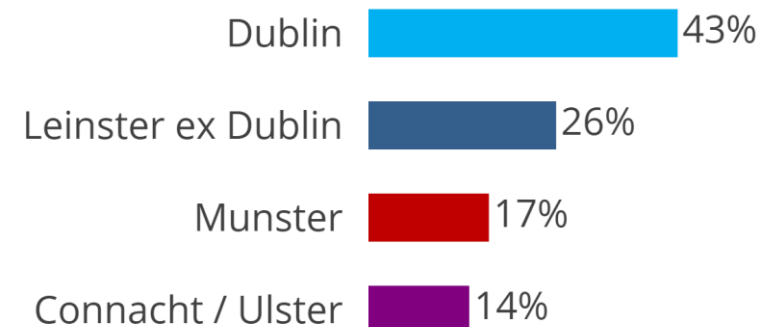

49%

51%

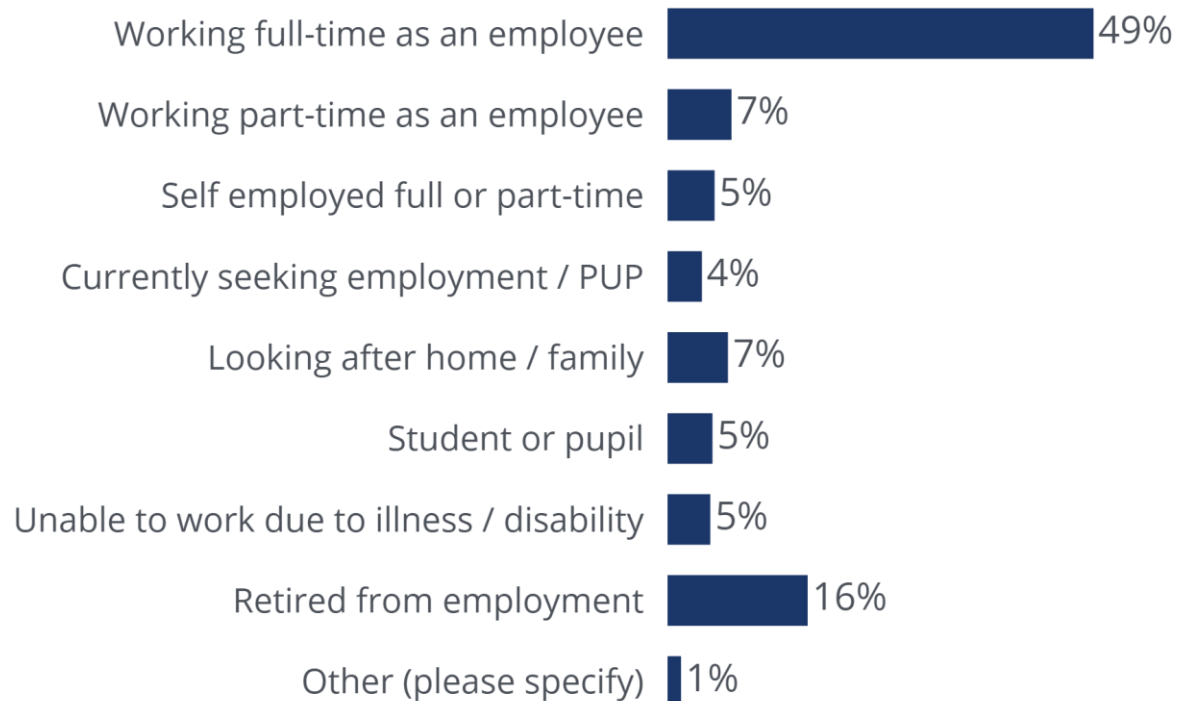

Age Group

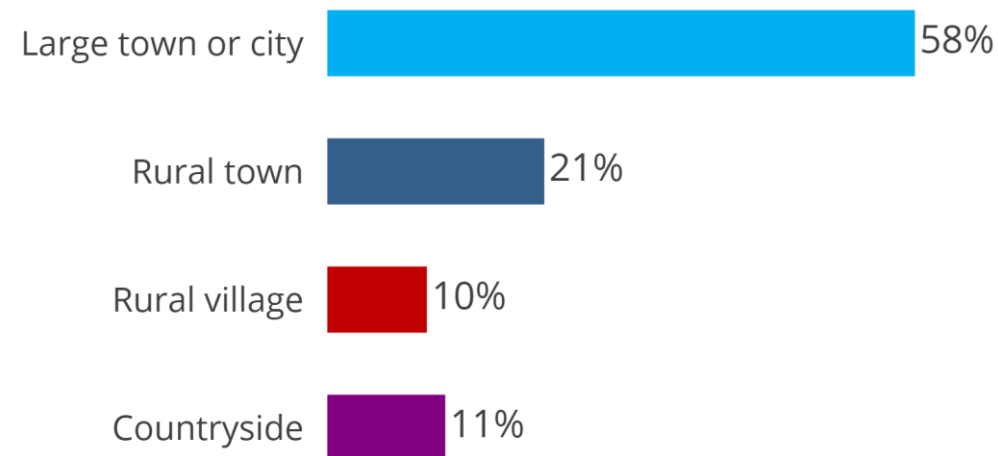

n=902

Employment Status

Area of Residence

n=902

Monthly Income After Taxes, Before Bills

Monthly Disposable Income After Bills Are Paid

n=884

Working in Related Profession (aviation, emergency services etc.)

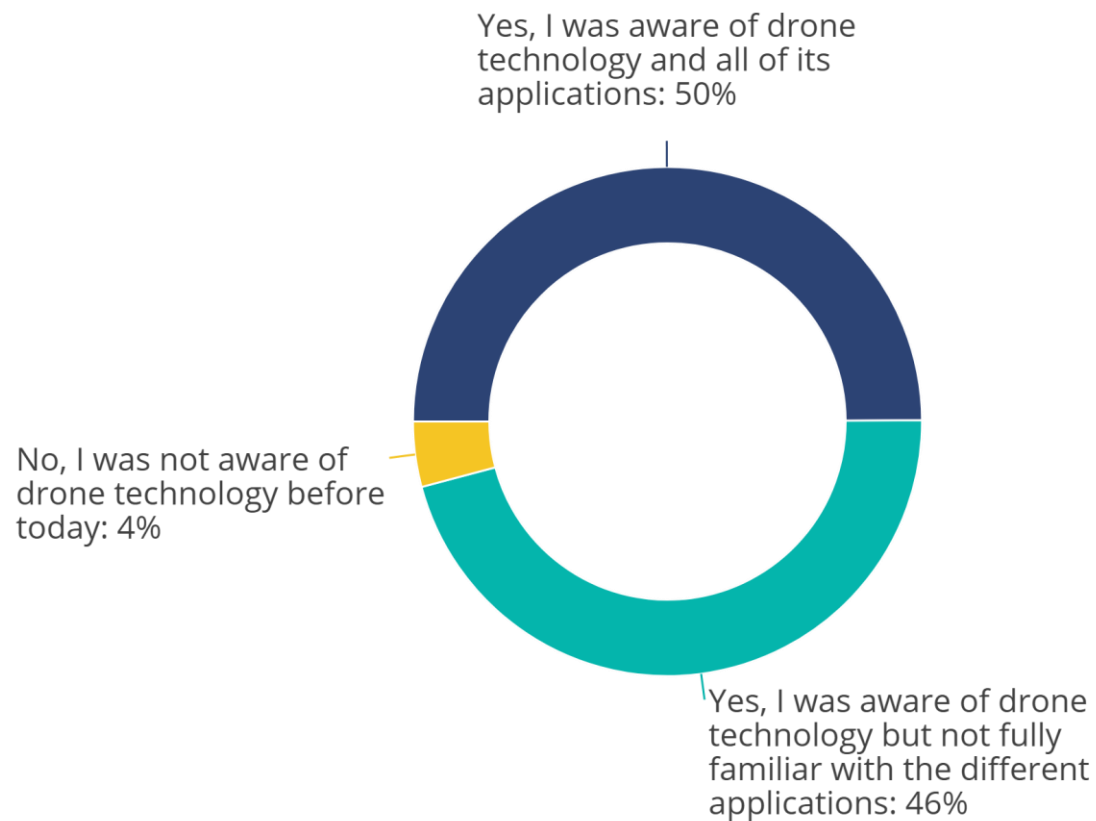

n=902

I.	Summary	2
II.	Background and Respondent Profile	6
III.	Drone Technology	10
IV.	E-Scooters	23
V.	5G Networks	30
VI.	Autonomous Vehicles	36
VII.	Concerns and Hopes for Technology	38

Before today, were you familiar with drone technology?

- Familiarity is higher among males, among younger respondents, and among those living in larger towns and cities.
- Familiarity also increases in line with monthly income.

n=902

How do you feel overall about drone technology?

■ Very negative ■ Rather negative ■ Rather positive ■ Very positive

84% feel positive about drone technology

- Positive sentiment is stronger among males (89%) than among females (79%)
- Positive sentiment is lower among over 65s at 76%

n=902

Do you ever use drones? Please select as many as apply to you.

- Use of drones is higher among males, among younger age groups and among those living in large towns and cities.

n=901

How likely do you think it is that drones will be part of your life **by 2025**?

■ Very unlikely ■ Rather unlikely ■ Rather likely ■ Very likely

- 18-34s consider online shopping delivery by drone more likely than other age groups.
- Anticipated likelihood tends to be higher among Connacht / Ulster respondents, particularly for mail delivery.
- Likelihood for online shopping delivery and grocery delivery is higher among those living in large towns and cities.

n=902

How do you feel about the following applications of drone technology to help deliver **public services**:

Very negative Rather negative Rather positive Very positive

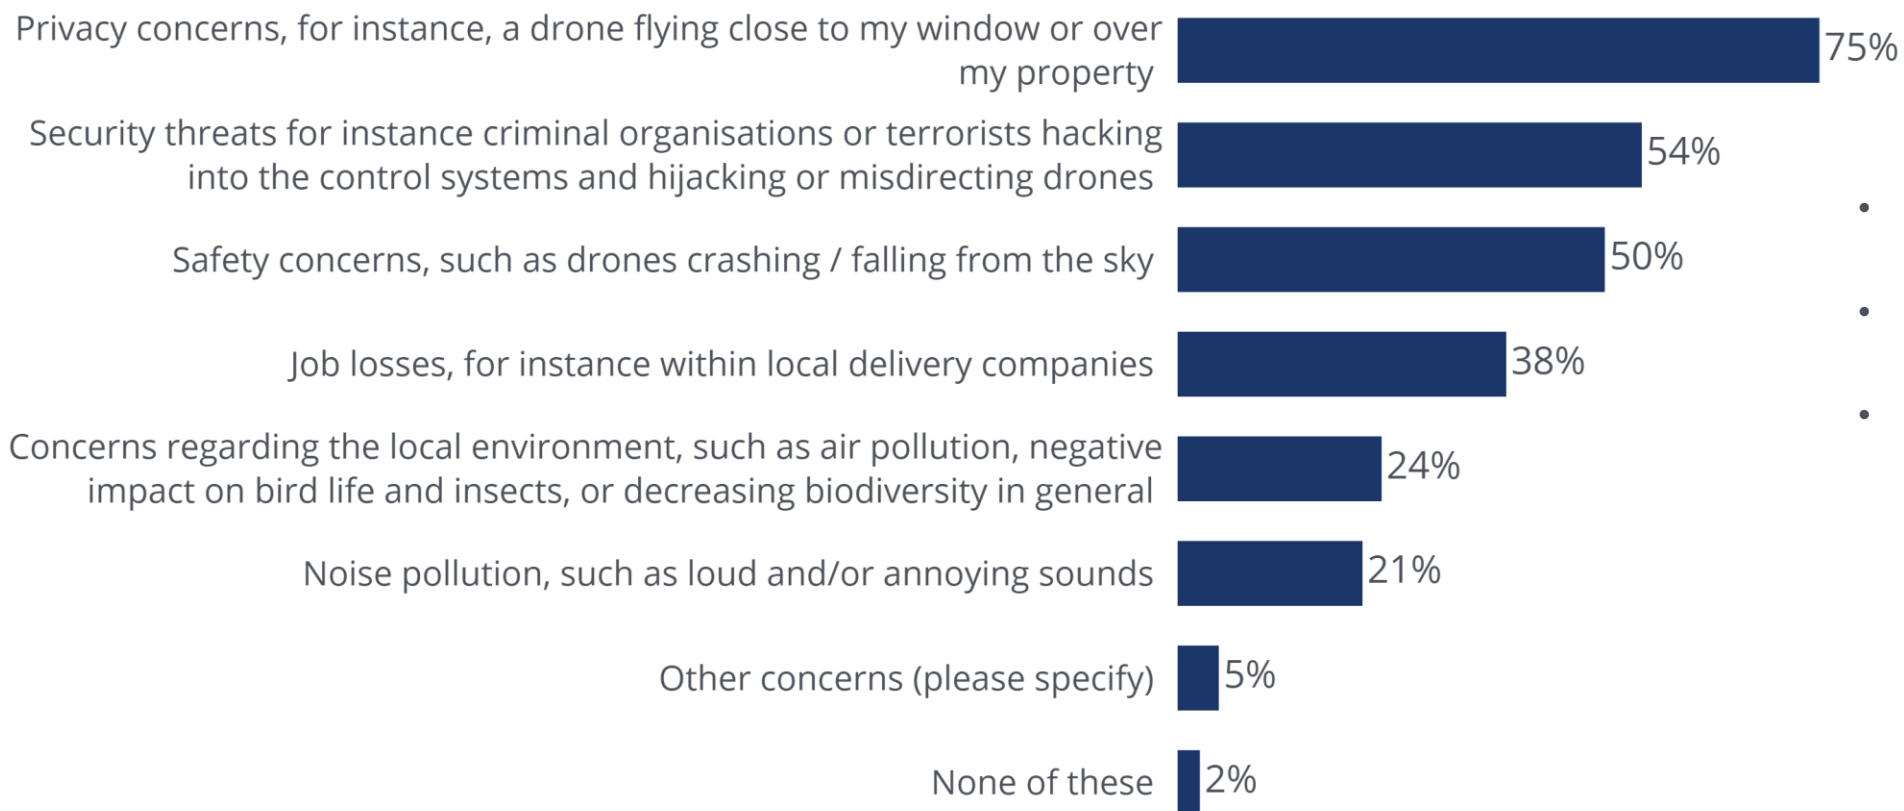

- Higher positive sentiment among males for use for drones for emergency services, planning and traffic management.
- Lower positive sentiment among 18-34 year-olds for the use of drones for emergency services, waste management and policing.

n=893

What are you most concerned about regarding the use of drones? Please consider your own usage of such a service as well as other people using it.

% selecting in **top 3**

- Job losses a concern for 52% of female respondents.
- Security threats are a concern for 68% of over 65s.
- Safety concerns were higher among Munster-based respondents (61%) and lower among those living in Dublin (45%).

n=902

Other Concerns Specified number of mentions

n=42

Have you ever had an issue where you saw a drone in your local area and had any concerns?

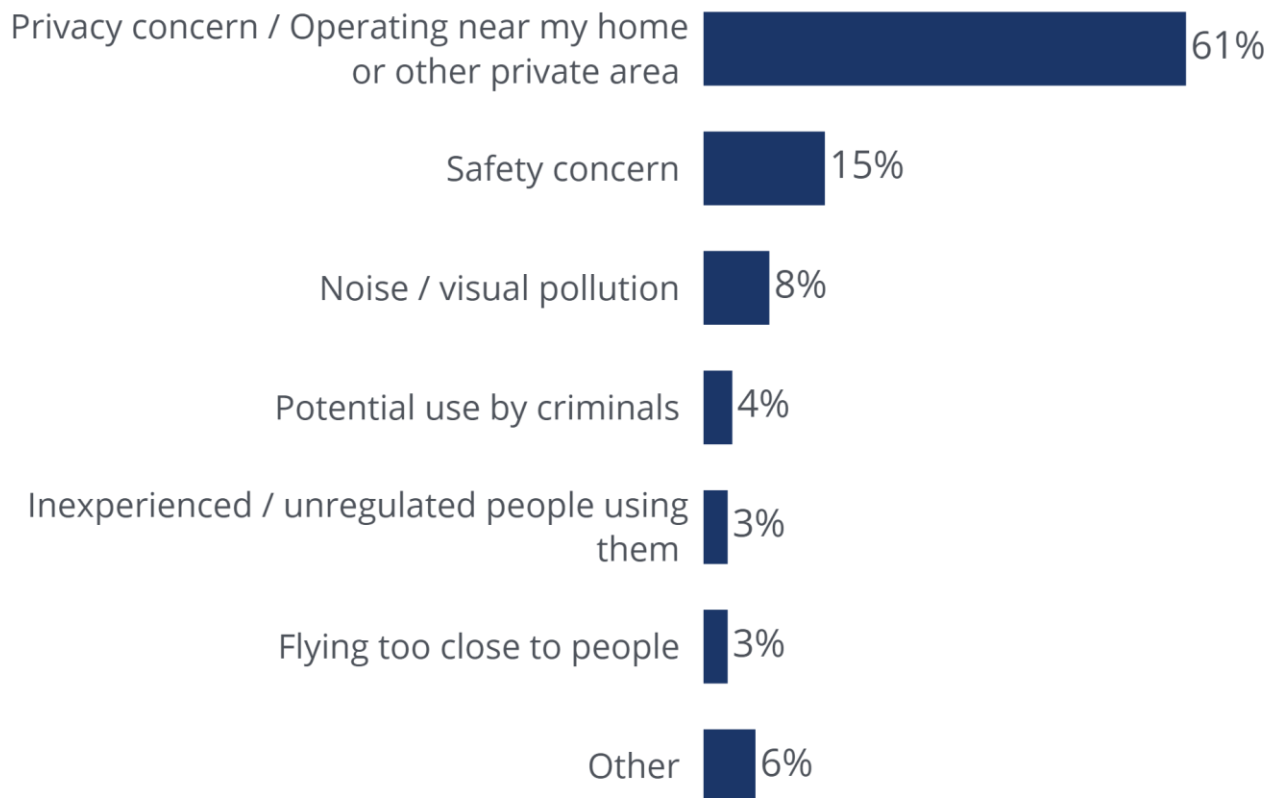

- Younger respondents and those living in Dublin or other large towns / cities were more likely to report experiencing a concern relating to drone use.

n=897

Personally Experienced Concerns (categorised from open-ended comments)

"Hovering and moving up and down outside buildings, focused on the windows. It looked like invasion of privacy."

"Invasion of privacy whilst sunbathing in back garden."

"Safety of the people, if the drone goes out of control."

n=171

If you saw a drone flying in your local area and you wanted to find out its purpose / ownership, how easy do you think it would be to find this information?

■ Impossible or Don't know ■ Difficult ■ Fairly easy with bit of searching ■ Very easy

11% feel this would be easy

- 18 to 34 year-olds were more likely to feel this would be easy (16%)

n=901

Do you think that members of the public should be able to get information about drone flights openly? For example via a public register of flights showing time and location information for drone flights.

- 65% of females feel that this would be essential.
- Those living in Dublin and other large towns / cities are more likely to feel that this would be essential.

n=902

Do you know who is responsible for regulating drone use in Ireland?

if yes->

Can you name the body responsible for regulating drone use in Ireland?

- Males, younger respondents, those living in Dublin / other large towns or cities and those on higher incomes were all more likely than average to know who is responsible for regulating drone use in Ireland.

n=801

I.	Summary	2
II.	Background and Respondent Profile	6
III.	Drone Technology	10
IV.	E-Scooters	23
V.	5G Networks	30
VI.	Autonomous Vehicles	36
VII.	Concerns and Hopes for Technology	38

Have you heard of e-Scooters before today?

- Awareness is higher among males and among those living in Dublin and other large towns / cities

n=901

Overall, do you feel that e-scooters will have a positive or negative impact?

Very negative Rather negative Rather positive Very positive

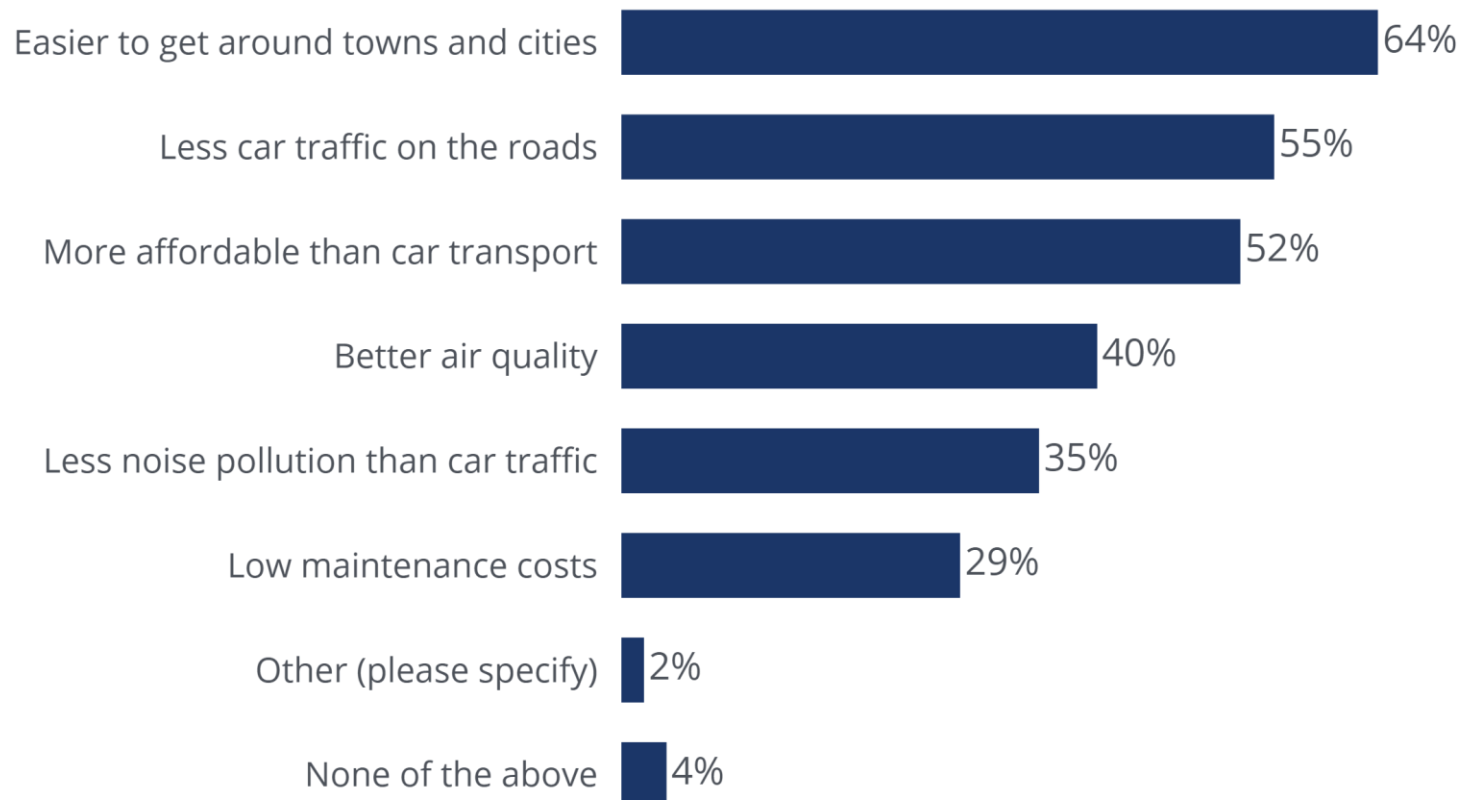

72% feel that e-scooters will have a positive impact

- Positive sentiment is higher among younger age groups – highest among 18 to 34 year-olds at 85%

n=902

What are the top positive aspects of e-scooters? Please select your **top 3** from the following list
% selecting in **top 3**

- “Better air quality” is a top positive aspect of e-scooters for 46% of those living in Dublin.

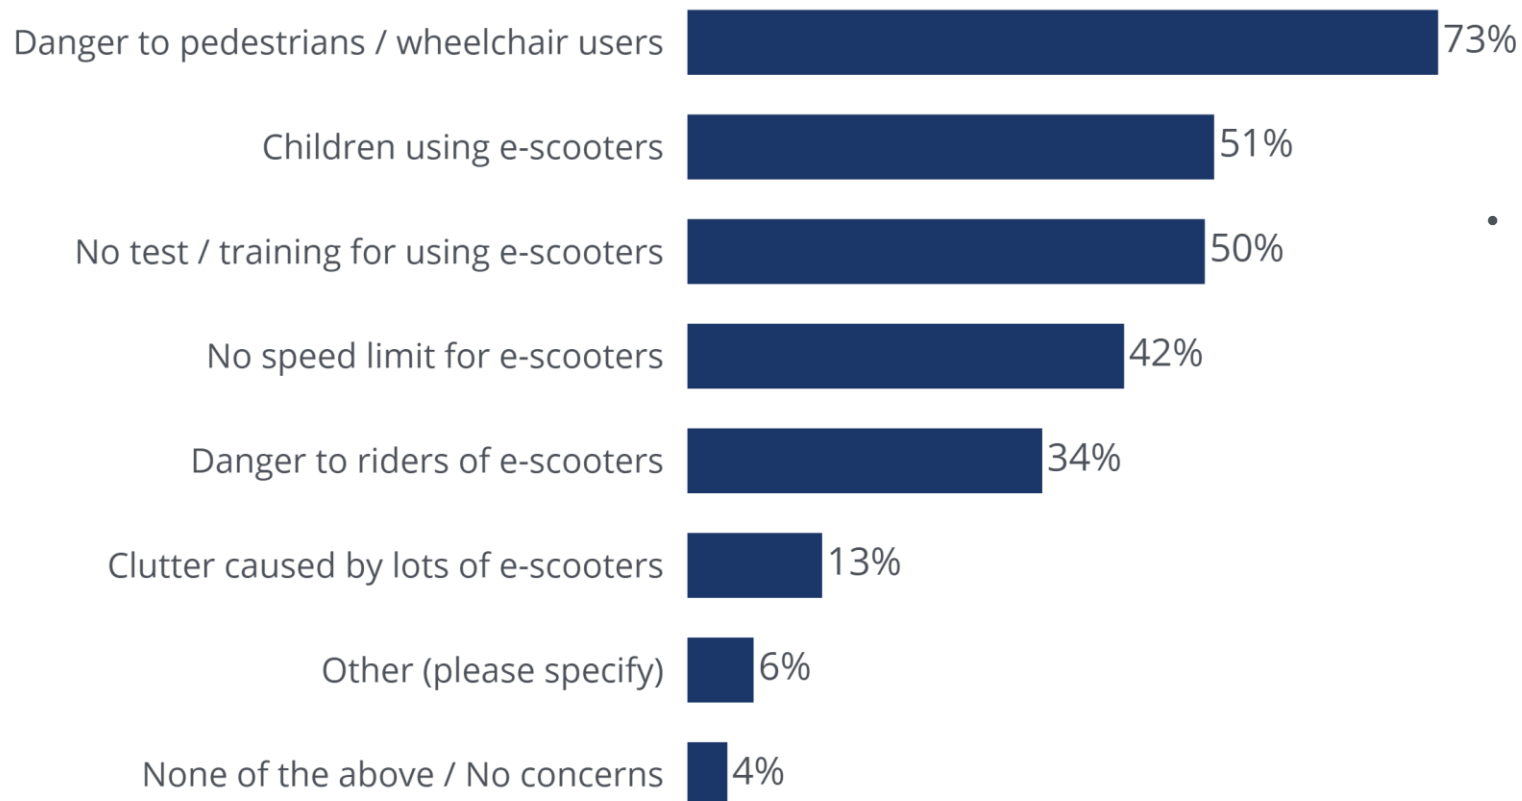

n=901

- >All of the above
- >An alternative that has potential but does not achieve the benefits listed in this section yet
- >Better for the environment
- >Dangerous
- >Dangerous for old people!
- >e-scooters are, according to research, attracting people from public transport and walking and not reducing private vehicle use. making the urban area more hazardous.
- >I don't use scooters. I believe they are overall positive impacts but the infrastructure is not there for scooter users or cyclists. There have been massive improvements recently with cycle lanes being pushed through. More of the same needs to be done.
- >I think in yhe wrong hand they are dangerous and people flying atound on the pavement would easly knock people over and children between the ages of 8to 16 shouldnt be allowed to use them without syRICT supervision and they should be made to get insurance as they can become a leathal weapon if not used correctly
- >Less school runs
- >Low carbon transport means.
- >may be dangerous to you
- >Safer than cars on our roads
- >There are positive aspects but they have no 'right' place in the city infrastructure - they don't belong on the footpath or the road so any interaction I've had one with one has felt dangerous, nor am I convinced they replace a lot of would-be car journeys.
- >They are nothing but Public Health Hazard by irresponsible people. The same as irresponsible people walking on footpath
- >They prompt better road maintenance as they cannot be used on rough surfaces

What concerns, if any, do you have about e-scooters? Please select your **top 3 concerns** from the following list
% selecting in **top 3**

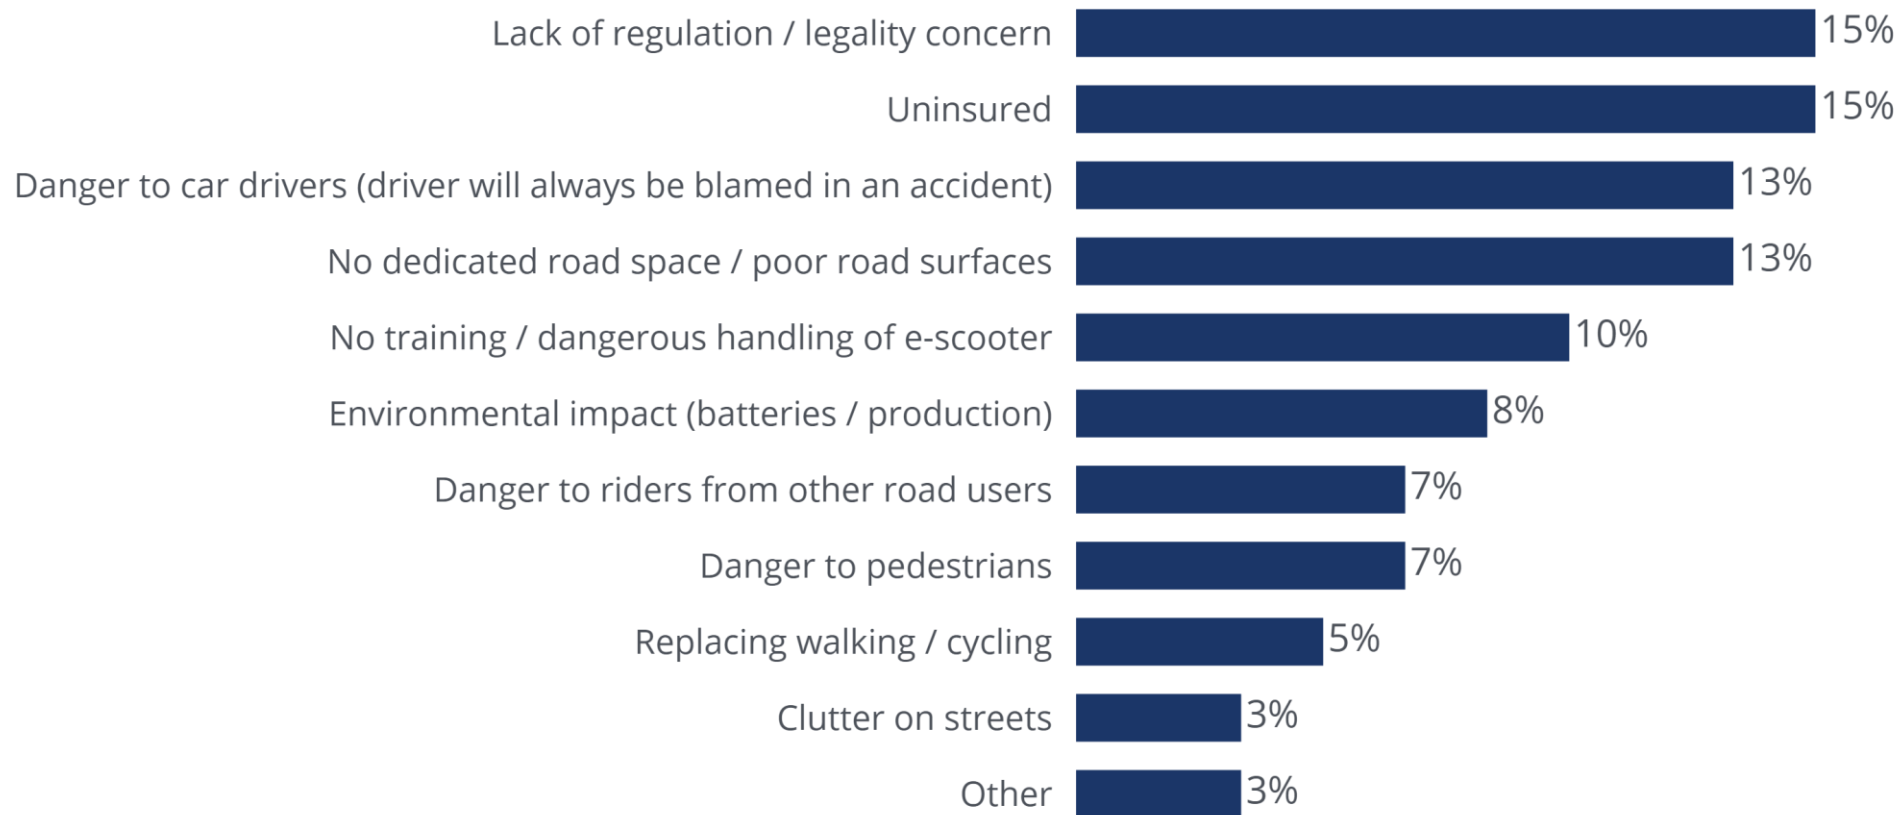

- “Danger to pedestrians / wheelchair users” is a concern for 85% of over 65s, and “Children using e-scooters” is a concern for 65% of over 65s.

n=901

Other concerns about e-Scooters specified

n=60

I.	Summary	2
II.	Background and Respondent Profile	6
III.	Drone Technology	10
IV.	E-Scooters	23
V.	5G Networks	30
VI.	Autonomous Vehicles	36
VII.	Concerns and Hopes for Technology	38

Have you heard of 5G networks before today?

- Awareness is higher among males, among younger respondents, and among those living in Dublin.
- Awareness increases as monthly income increases.

n=901

Overall, do you feel that 5G networks will have a positive or negative impact?

Very negative Rather negative Rather positive Very positive

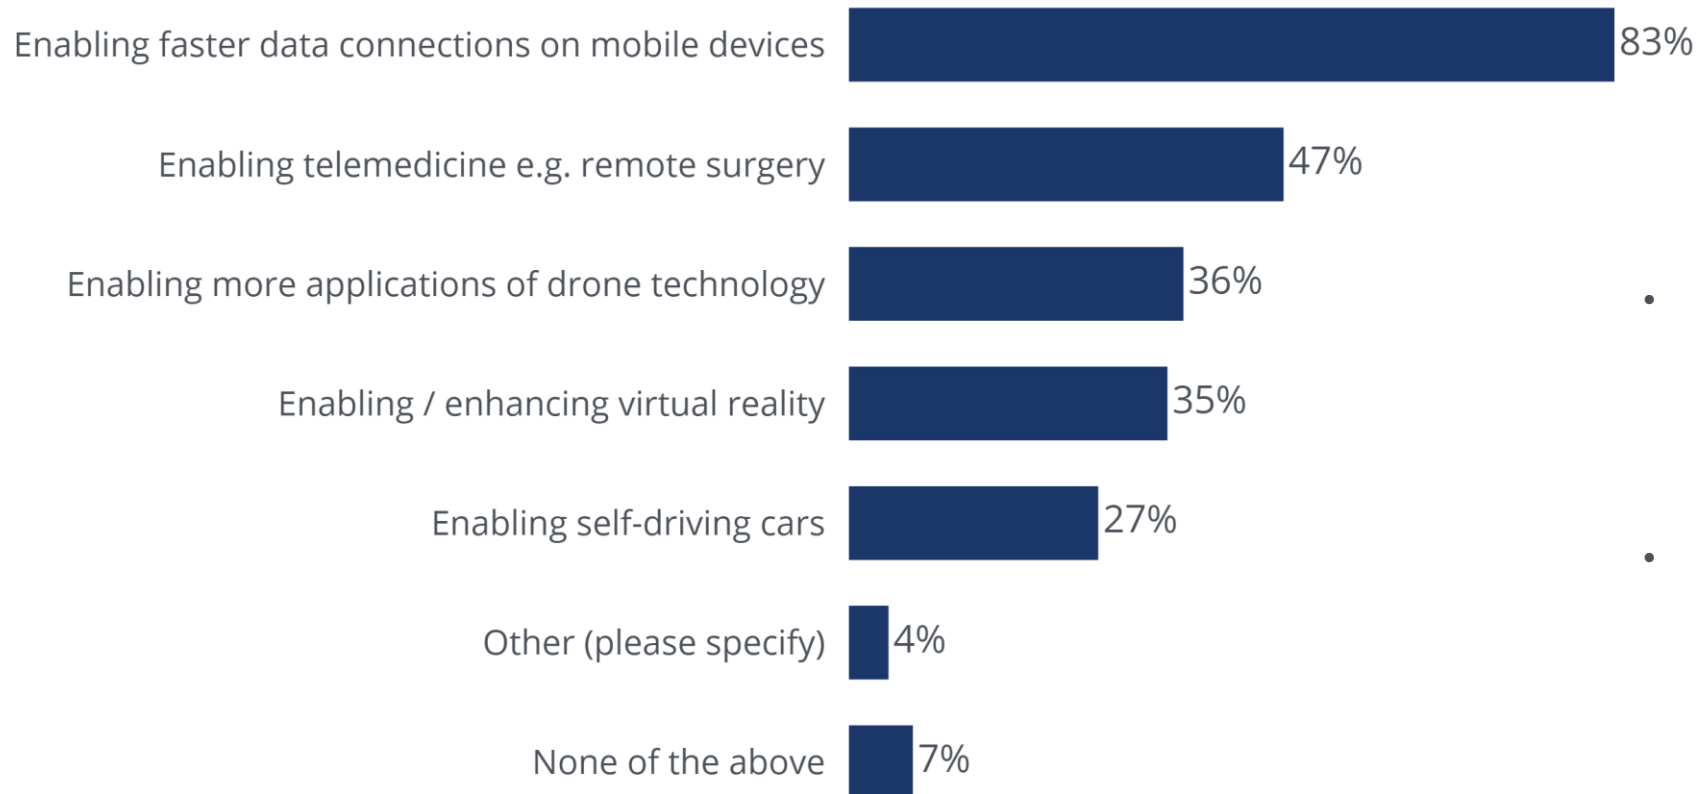

90% feel that 5G networks will have a positive impact

- This is highest among males (94%) and among those living in large towns and cities (94%)

n=901

What are the top positive aspects of 5G networks? Please select your **top 3** from the following list
% selecting in **top 3**

- “Enabling self-driving cars” is a stronger positive among younger respondents while “Enabling telemedicine” is stronger among older respondents.
- “Enabling telemedicine” is a top positive aspect for 57% of Connacht / Ulster respondents.

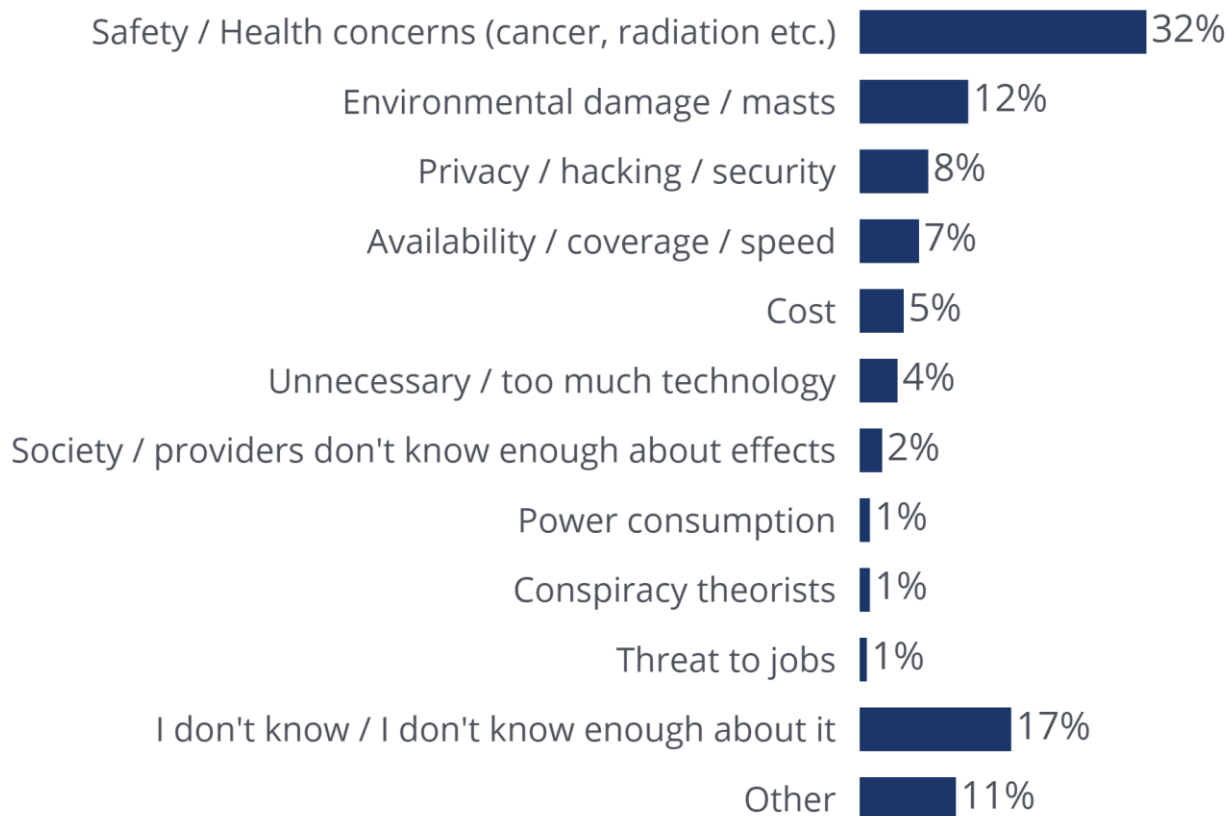

n=900

- >5g would be great if it was made safe
- >Allowing people in rural area have faster speed internet allowing work from home, use of technology in farming etc
- >Automation and connectivity for remote IoT devices
- >Better competition, reducing prices and increasing access.
- >Better connection for IoT medical devices Better connections for remote areas
- >Better connectivity could help in rural areas, allow for less concentration of population
- >Better internet connection in rural Ireland potentially
- >Better more penetrative internet presence
- >Driver assisted rather than self drive
- >Enables It/ot integration at a nationwide scale
- >enabling digital twin technology in smart buildings and cities
- >Enabling IoT
- >Enhancing online applications, in general
- >Faster broadband and phone coverage.
- >Faster speeds for hospitals and schools
- >General increase in connectivity and in rural areas, where a mast is sited, less dependence on fixed line broadband.
- >Hopefully we can share the internet with the developing world
- >I believe the biggest benefits of 5G technology will be for enterprise use cases and won't make a huge amount of difference for those of us who already access 4G on our devices.
- >I don't feel there are specific benefits beyond allowing telcos to further trade off their spend vs. Service (historically better tech has meant telcos spending less on infrastructure rather than using the improved tech to provide better service).
- >I think we don't fully know yet what the best benefits will be
- >Improved real time info
- >Lower energy comms
- >new applications
- >phone technology in general would be better and faster
- >Pollution/ Emit radiation/ Public Health Hazard
- >Providing better rural broadband
- >Providing fast, reliable internet speeds not just for mobile devices outside of urban areas.
- >Raising the bar for mobile data across the board meaning rural areas have access to faster wireless broadband
- >Real time information such as traffic congestion or closed roads.
- >Reduction of carbon emissions with smart tech based on 5g
- >remote working
- >The ability to connect rural homes to high speed broadband without physical connection. Empowering rural Ireland and enabling people to work and live outside cities.
- >Tracking idiots on e-scooters and tracking drones flown by idiots

What concerns, if any, do you have about 5G networks?

(categorised from open-ended comments)

"Cancer causing radiation."

"Danger to health and the environmental impact."

"Energy consumption from network and mast locations."

"Privacy and cyber security."

n=290

I.	Summary	2
II.	Background and Respondent Profile	6
III.	Drone Technology	10
IV.	E-Scooters	23
V.	5G Networks	30
VI.	Autonomous Vehicles	36
VII.	Concerns and Hopes for Technology	38

When do you think the use of autonomous vehicles will be a reality for members of the public in Ireland?
anticipated year

- Those living in the countryside or one-off housing had longer timeframes for the realisation of all types of autonomous vehicles.

n=871

I.	Summary	2
II.	Background and Respondent Profile	6
III.	Drone Technology	10
IV.	E-Scooters	23
V.	5G Networks	30
VI.	Autonomous Vehicles	36
VII.	Concerns and Hopes for Technology	38

What, if any, are your concerns about how technology is evolving?

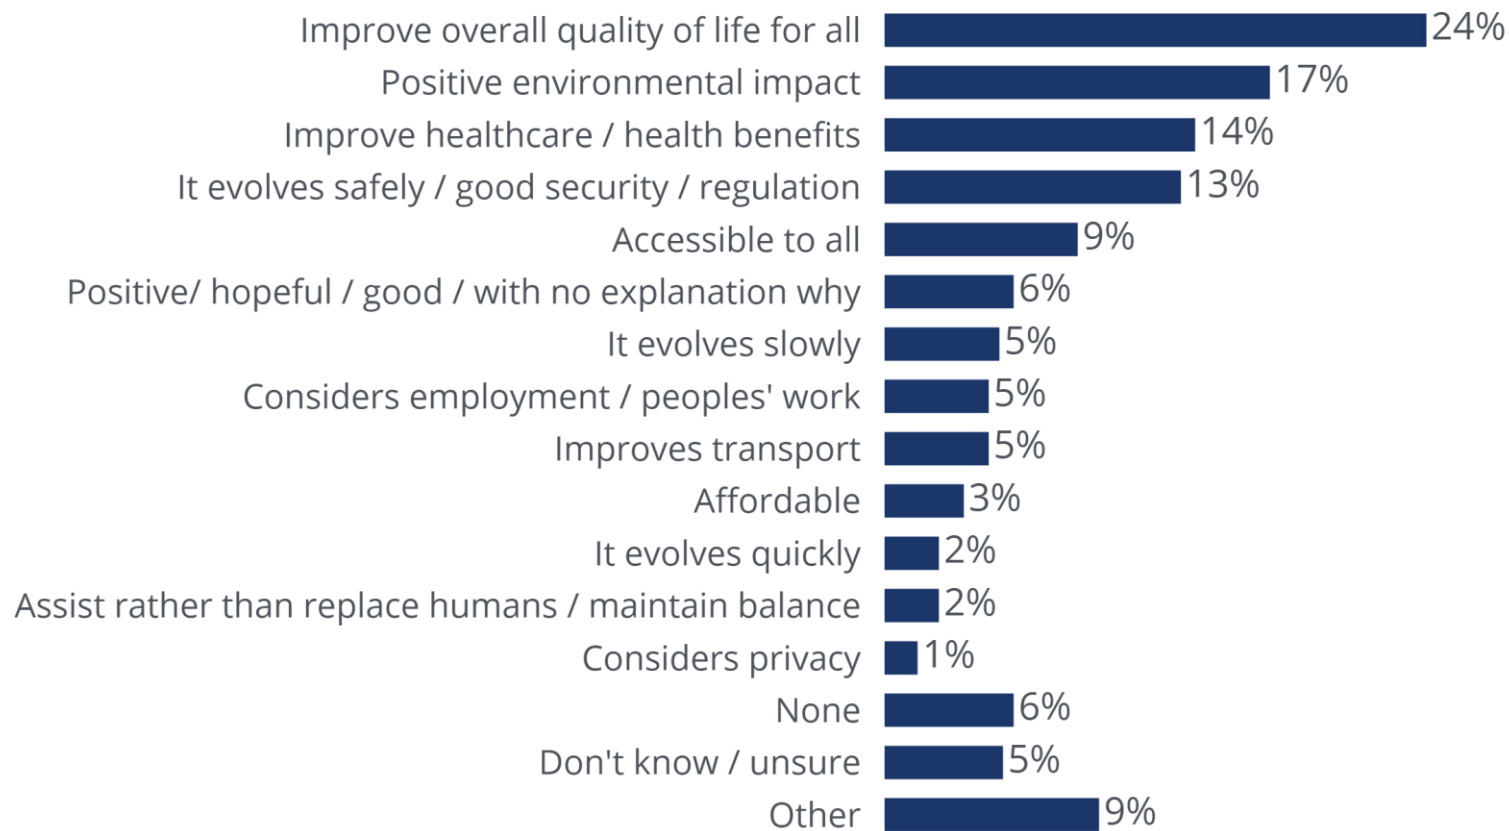

(categorised from open-ended comments)

What are your hopes for how technology will evolve?

(categorised from open-ended comments)
